SUMMARY

A highly motivated and results-oriented Information Technology student at Government Engineering College, Bhavnagar, with a strong foundation in Machine Learning and data-driven problem solving. Proficient in Python, Java, and SQL, with a keen interest in exploring advanced machine learning concepts and real-world applications.

EDUCATION

Government Engineering College | Bhavnagar, Gujarat, India

Bachelor of Engineering in Information Technology | June 2023 - Present | CGPA: 7.92

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch
- **Other Skills:** Data Visualization, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis

PROFESSIONAL EXPERIENCE

Ai & Cloud Technologies Intern | IBM x Edunet Foundation | Remote

July 2025 – August 2025

- Gained hands on experience in Artificial Intelligence and IBM cloud services.
- Learned and applied end-to-end project development lifecycle, from problem analysis to final presentation.
- Developed a Predictive Maintenance of Industrial Machinery Project on IBM Cloud with the help of WatsonX runtime service.
- Technologies: Python , IBM Cloud , RAG , LangChain

PROJECTS

Medical ChatBot Assistant

LangChain, Pinecone, Gemini API

- Built an AI-powered medical assistant chatbot capable of answering health-related queries using LangChain and Gemini API for natural language understanding.
- Used Pinecone vector database for efficient context retrieval & similarity search, enabling personalized query handling.

Image Classification

Python, NumPy, Pandas, SVM, scikit-learn, OpenCV

- Developed an image classification model using Support Vector Machine (SVM) to categorize individuals based on their associated sports.
- Utilized OpenCV for image preprocessing and feature extraction; employed NumPy, Pandas, and scikit-learn for data handling and model building.

Car Price Predictor

Python, XGBoost, scikit-learn, HTML, CSS, Flask

- Built a machine learning model using XGBoost to accurately predict car prices based on features like brand, model, year, and fuel type.
- Performed thorough data cleaning and preprocessing on a real-world car dataset; deployed the model through a web interface using Flask.
